**TREATMENT TIME:** \_\_\_\_\_

**PLACE:** \_\_\_\_\_

## **After Treatment Pest Control**

**All residents must plan to be out of the house for a minimum of 2 hours. Household pets must plan to stay out of the house for 4 hours. Birds need 24 hours.**

**Maintain a clean and sanitary home environment.**

**This involves vacuuming and regular housekeeping especially the kitchen.**

**Remove and clean food scrapes that may provide a source of food for cockroaches. It is very important to regularly clean stoves cooking surfaces, between cabinets and appliances, under refrigerators and inside cabinets.**

**Removing and eliminating water that cockroaches need for survival. This is a particularly important way to help with cockroach control.**

**Removing, organizing and cleaning up clutter, piles of newspaper, grocery bags, cardboard or anything else that will provide protective hiding places for cockroaches.**
