OPEN PLACEMENT METHOD NOT TO BE USED IN CALIFORNIA

Indoor: Use Gourmet Ant Bait Gel for the control of ants or German Cockroaches. Make long thin lines in areas where ants are a problem. Use 1-3 lines for each placement. Place baits where ants are trailing or have been seen. Place bait under food cabinets, sinks, stoves, refrigerators, food storage areas, attics, garages, basements, storage areas, closets, etc.

Outdoor: Place on exterior window-sills and in doorways to help prevent entry of ants.

Wash hands thoroughly before handling bait to remove any odors that may be repellent to ants, i.e. tobacco, garlic, strong chemicals/ cleaners etc. Remove as many competing food sources as practical. Ants are attracted to and will feed on Gourmet Ant Bait Gel until they die. The ants will return to their nests after consuming the bait and will feed their young and the queen. Repeat placement of the bait until satisfactory control has been achieved.

To use Ant Café bait station: open the lid, add Gourmet Ant Bait Gel until station is at least half full, close lid and place according to directions for use. See pictures for further information. Optional: (insert pictures filling of Ant Café)

Do not use sprays, foggers or any strong chemicals or cleaners near the bait containers or placements. This may contaminate the bait and cause the insects to cease feeding.
